

JOHN DOW
Environmental and Safety Technical Expert
U.S. Naval Ordnance Safety and Security Activity

Mr. Dow is the NOSSA staff environmental and safety technical expert. Additionally, he administers the Navy's standard operating procedures guidance, and the Navy program for qualification and certification of explosives handlers. In the DoD environmental R&D program, he represents the NOSSA in the areas of UXO detection and discrimination, and range residue processing.

Mr. Dow holds a B.A. in environmental biology from the University of California, and a B.S. in chemical engineering from the University of Maryland.
